## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 22, 25, 33, and 36-38 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claim 22 recites a negative electrode comprising ceramic particles, wherein the ceramic particles are  $\text{Al}_2\text{O}_3$  particles. JP 8-298121, the closest prior art, discloses a negative electrode comprising carbon/ceramic composite particles. In the Appeal Brief of November 17, 2004, Applicant states that "[o]pen-ended claim language has not been used" with respect to the composition of the particles. This argument is accepted and the claim language is considered to exclude composite particle compositions such as that of JP '121. As such, the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
